How to Use

Ampelite Handy Panel is inexpensive, lightweight, and easy to handle or store, so any project can become a satisfying and satisfactory DIY job. Ampelite Handy Panel sheet size is 610mm x 1220mm. Sheets can be cut using normal tools such as a fi ne tooth saw, sharp knife and shears or tin snips.

The sheet can be simply cleaned of dirt and grime by using a soft brush and soapy water. No abrasives should be used or the sheet will may be damaged.

Ampelite Handy Panel should be stored on a fl at surface, in a dry area avoiding contact with chemicals, paints and solvents. Do not leave sheets in direct sunlight while in a stack. The stack will magnify the suns heat and cause sheet distortion. If sealants are to be used with Ampelite Handy Panel, ensure the sealant is compatible with polycarbonate sheeting. For a list of compatible sealants, please contact your Ampelite offi ce on free phone 0800 267 354
